Cryptocurrency

Cryptocurrency is a form of digital or virtual currency secured by cryptography, making it nearly impossible to counterfeit or double-spend. It is decentralized and operates on blockchain technology, a distributed ledger enforced by a network of computers (nodes).

Blockchain

Blockchain is a decentralized, distributed ledger technology that records data in a secure, immutable, and transparent way. It operates on a peer-to-peer network and eliminates the need for intermediaries, enabling trustless transactions. The data in a blockchain is stored in a series of blocks, which are linked together chronologically and cryptographically.

About Company

100% Decentralised System

100% Distribution

100% Upgradation

No H.O / No Admin / No Franchises
or Branch

Starting from minimum 1\$

PLAN-A (JOINING MIN. 1\$)
